OKNexus connects proven infrastructure, open tooling, and AI-native blockchain execution into one ecosystem.

- A SMARTER BLOCKCHAIN FOR

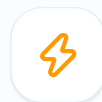

The Next Generation of Digital Finance

OKN Token is designed to make blockchain interactions faster, easier, and smarter for users, builders, and ecosystem partners.

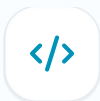

AI at Network Level

AI lives in the chain itself, optimizing performance, transaction routing, security, and execution.

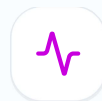

Faster Experience

Sub-second transaction finality, lower gas fees, and seamless Web3 interaction flows.

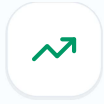

Smarter for Builders

An AI-native developer environment for decentralized apps, smart contracts, and cross-chain products.

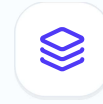

Clearer Onchain Activity

Deep contextual transaction intelligence, automated risk scoring, and real-time network behavior insights.

Built for Growth

Scalable Layer 1 infrastructure, robust token utility, multi-audited contracts, and a staged global rollout.

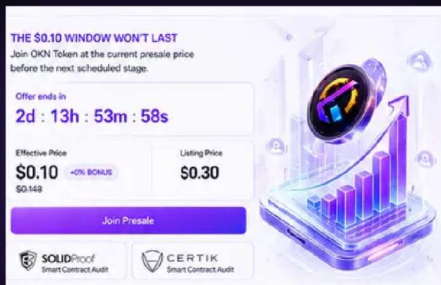

Cross Chain Native

Designed from first principles to connect global ecosystems without locking users into an isolated silo.

LIMITED ENTRY WINDOW

The \$0.10 Window Won't Last

• OKNEXUS ECOSYSTEM

One Token. Multiple Possibilities.

OKN fuels an expansive network of financial primitives, AI automation, and high-performance Web3 services.

FLAGSHIP PLATFORM

OKNexus Exchange

High-throughput decentralized & institutional trading engine with ultra-low latency, deep liquidity order routing, and zero-slippage execution powered by OKN.

⚡ 0.01s Execution Latency

Tier-1 Liquidity Aggregation

AUTONOMOUS INTELLIGENCE

AI Prediction Agent

On-chain neural network monitors liquidity flows, mempool risk signals, and order books to provide real-time predictive analytics.

Risk-Aware Autopilot

DEFI PRIMITIVES

Staking & Yield Vaults

Lock OKN tokens to secure network validation, earn protocol fee distributions, and unlock governance tiers.

Tiered Multipliers • Non-Custodial

INTEROPERABILITY

Cross-Chain Instant Swaps

Frictionless bridging and atomic cross-chain liquidity across Ethereum, Arbitrum, Solana, and major L1/L2 networks.

Multi-Chain Routing • Zero Slippage

INCUBATION**OKN Launchpad**

Guaranteed allocation tiers for the most promising early-stage Web3, AI, and fintech decentralized projects.

Vetted Tier Access • Community First

**SECURITY****Institutional Custody & Wallet**

Multi-signature key security, biometric authentication, and smart-contract protected storage for all assets.

AssureDeFi KYC • Multi-Audited

• **TOKEN UTILITY**

More Than a Token. The Operating Fuel of OKNexus.

Every interaction across the OKNexus ecosystem leverages OKN as its fundamental economic and governance backbone.

Fee Discounts & Zero-Gas Swaps

Holders enjoy up to 80% discount on exchange trading fees and subsidized network gas fees across ecosystem smart contracts.

✓ Verified Utility

Protocol Governance

Participate directly in key protocol proposals, liquidity incentive allocations, asset listings, and treasury distributions.

✓ Verified Utility

Staking & Fee Sharing

Stake OKN in protocol revenue pools to capture real yield generated from exchange trading fees and swap volume.

✓ Verified Utility

AI Feature Access Tiers

Unlock proprietary AI market intelligence algorithms, algorithmic signals, and automated copy-trading capabilities.

✓ Verified Utility

OKNexus Roadmap

A phased rollout from core infrastructure and AI features to ecosystem expansion and global network utility.

Q1 2025

🟢 Completed

Idea Foundation

- Core vision defined: AI-native chain with transaction risk awareness
- Founding team and global contributor base assembled
- Early technical direction and design principles established
- First whitepaper and architecture litepaper published

Q2 2025

🟢 Completed

Early Access Community

- Token infrastructure engineered and tested
- Independent third-party security audits completed
- Early supporter whitelist opened to global community
- Official verified channels launched across major platforms

Q3 2025

🟢 Co

Beta Testnet

- First public testnet brought online with uptime
- Block explorer support and telemetry dashboard introduced
- Faucet and developer onboarding SDKs available
- Initial feedback loops with validator community

PHASE 01

• KNOWLEDGE BASE

Frequently Asked Questions

Everything you need to know about OKN Token, the presale stages, and the OKNexus ecosystem.

What is OKN Token?

OKN Token is the native utility and governance asset of the OKNexus ecosystem. It powers transaction fee settlement, AI trading engine access, decentralized governance, staking rewards, and cross-chain liquidity routing.

What makes OKNexus different from traditional blockchains?

What is the current entry price and listing price?

How can I participate in the presale?

Is the OKN smart contract audited and verified?

What is the total supply and vesting schedule?

When will the Token Generation Event (TGE) occur?

FINAL PRESALE STAGE ALLOCATION

Every Stage Brings A Higher Price

The current \$0.10 entry window is available for a limited time before the next scheduled increase.
